

luaF_close

```
graph LR; A[luaF_close] --> B[luaF_closeupval]; B --> C[luaF_unlinkupval];
```

The diagram illustrates a sequence of three Lua functions. The first function, 'luaF_close', is highlighted with a gray background. It points to the second function, 'luaF_closeupval', which then points to the third function, 'luaF_unlinkupval'. All functions are contained within rectangular boxes, and the flow is indicated by blue arrows.

luaF_closeupval
